

**PREFACE**  
**The 3<sup>rd</sup> Global Research on Sustainable Transport and Logistics**  
**(GRoSTLog) 2019**

Trisakti Institute of Transportation and Logistics

The 3<sup>rd</sup> Global Research on Sustainable Transport and Logistics (GRoSTLog) will be held on 1<sup>st</sup> – 2<sup>nd</sup> August 2019 at the Hall of Trisakti Institute of Transportation and Logistics, Jakarta, Indonesia. The theme of GRoST 2019 paper conference will focus on a range of topics related to research in Transportation, Sustainable Information and Technology, Supply Chain Management, Business and Sustainable Tourism.

Transportation has broad multidisciplinary focuses apart from its function as the main tools to carry passengers and goods. Air transport plays a significant role as enabler to achieving economic growth and development. It provides vital connectivity on a national, regional, and international scale. Over the past few years, air transportation and aviation industry have been vulnerable to ups-and-down in economics not to mention its volatility in supply and demand. Aviation industry confronts with the rise of low cost carriers, highly competitive market, rise of fuel price, safety and security, a smaller-than-expected profit margin, labor issues and other financial situations. In line with this, Trisakti Institute of Transportation and Logistics is committed to provide a forum for relevant researches and innovations that contribute to competitiveness, efficiency, convenience, safety and well-being.

There were 100 papers from various topics but not limited to Aviation Industry in Disruptive Environment; Growth of Aviation Industry; Low cost carrier; Aviation Safety; Business and Management on: Transportation, Tourism, and Logistics. Those papers were selected through a strict peer-review process, and 80 papers are published in the conference proceedings.
